Proposal to make a Low Emission Zone scheme – Glasgow City Council

Under the powers granted by the <u>Transport (Scotland) Act 2019</u>, and in accordance with <u>The Low</u> <u>Emission Zones (Emission Standards, Exemptions and Penalty Charges) (Scotland) Regulations 2021</u> and <u>The Low Emission Zones (Scotland) Regulations 2021</u>, Glasgow City Council (GCC) proposes to introduce a Low Emission Zone (LEZ) in Glasgow.

Statement of Reasons

The introduction of Glasgow's LEZ supports the following Strategic Plan themes:

- A Vibrant City
- A Healthier City
- A Sustainable and Low Carbon City

The following Strategic Plan actions are supported:

- Glaswegians are active and healthier
- Glasgow is healthier
- The city is clean and public spaces are well maintained

Glasgow City Council undertakes monitoring of air pollution levels across the city and significant progress has been made in improving the air quality experienced by residents and visitors. The city has previously declared Air Quality Management Areas (AQMA) for four areas of the city in respect of exceedances of the air quality objectives, including one which covered the whole of the City of Glasgow. Improvements have resulted in the objectives being met in recent years with the exception of areas within the city centre AQMA where levels of nitrogen dioxide (NO2) are still of concern. Some areas of exceedance are experiencing NO2 levels around 50% above the objective and decisive action is needed to sufficiently reduce this in an acceptable timescale.

In Glasgow, the majority of air pollution is attributed to road traffic emissions and LEZs are an established method of improving air quality by restricting access by the most polluting vehicles to areas of concern.

Initial work with the Scottish Environment Protection Agency (SEPA) identified the bus fleet as the major source of emissions in the streets with the highest levels of NO2. This resulted in Glasgow introducing Scotland's first LEZ at the end of 2018 which targeted the bus fleet and required progressive improvements in the number of cleaner buses entering the city centre.

However, the initial <u>SEPA Air Quality Evidence Report</u> also highlighted that bus fleet improvements on their own would not be sufficient to comply with the air quality objectives. The SEPA report considered the potential impacts of a range of LEZ interventions to determine their respective benefits to NO2 levels.

Initial proposals for aspects of an extended scope LEZ scheme were subject to public consultation in February and March of 2020. Views were sought on a range of subjects such as boundary options, exemptions and grace periods. A report on the initial public consultation can be found <u>here</u>.

Following the consultation, further work was undertaken to assess the LEZ options, including transport modelling of the impacts, incorporating other committed developments and policies affecting the LEZ area. This modelling examined the effect of the LEZ on the city centre and the potential for increased traffic on peripheral routes due to diversions by non-compliant vehicles. The initial transport modelling report can be found <u>here</u>. The results of the consultation and the further development work undertaken, led to the development of a preferred LEZ scheme.

The impact of recovery from the pandemic on the development of LEZs was considered, first in a Scotland wide context within the LEZ Uncertainty Summary Note and then within a finalised LEZ Traffic Modelling Report which incorporated the potential recovery scenarios. The COVID-19 pandemic and resulting travel restrictions have led to air quality improvements in 2020, however monitoring has shown that traffic levels have returned to mostly pre-pandemic levels with air pollution rising from the historic lows experienced in 2020. Therefore, to ensure pollution levels meet the health based objectives within a reasonable timeframe, the LEZ remains the most effective and appropriate method to achieve this.

The evidence presented to date shows that considerable reduction in traffic related NOx emissions, the major component of city centre NO2 pollution, can be achieved through the implementation of the proposed Glasgow LEZ scheme and, as such, is predicted to considerably reduce ambient levels of this pollutant which currently exceeds the objective levels.

The preferred LEZ scheme was subject to statutory public consultation between the 24th June and the 2nd September 2021. A report on this consultation is available <u>here</u>. As a result of this consultation, minor changes were made to the boundary of the LEZ and these are detailed along with the other elements of the LEZ within this proposed final scheme design.

Glasgow City Council therefore proposes to extend the LEZ scope to cover all other vehicle types, with the exception of motorbikes and mopeds, which have been scoped out of the proposed LEZ scheme, and those vehicle types subject to national exemptions as detailed in <u>The Low Emission</u> <u>Zones (Emission Standards, Exemptions and Enforcement) (Scotland) Regulations 2021</u> and later in this report.

The LEZ Scheme Objectives

The objectives of the Glasgow Low Emission Zone are as follows:

- Improve public health of residents of and visitors to the City of Glasgow by contributing towards meeting the air quality objectives prescribed under section 87(1) of the Environment Act 1999.
- Contribute towards the emissions reduction targets set out in Part 1 of the Climate Change (Scotland) Act 2009 through the promotion of low and zero emissions vehicles and the promotion of public and sustainable transport options.
- Improve the amenity of Glasgow through the promotion of the Glasgow City Council Strategic Themes of A Vibrant City, A Healthier City and a Sustainable and Low Carbon City.

Map of Proposed LEZ Area and Roads Listing

A map of the proposed Glasgow LEZ can be seen below. The map can also be downloaded in higher resolution from here.

Roads within the proposed LEZ are listed in Appendix A

Introduction date for the LEZ Scheme and Grace Periods

It is the intention of Glasgow City Council to introduce the LEZ on **31**st **May 2022**. Glasgow City Council has committed to improving air quality by enforcing the LEZ at the earliest opportunity and therefore proposes a one year grace period, meaning enforcement of entry restrictions will begin on **1st June 2023**.

A further grace period is proposed for vehicles registered to **residents within the LEZ**, reflecting their restricted options in respect of choosing to enter the LEZ. Therefore enforcement of entry restrictions for vehicles which fall within this category will begin on **1**st **June 2024**.

Operating Hours of the LEZ

The Glasgow LEZ will operate at all times, 365 days a year and 24 hours a day.

The Glasgow LEZ is proposed in respect of breaches of the annual mean nitrogen dioxide objectives and therefore emissions at all times contribute to these breaches.

Glasgow City Council may temporarily suspend the operation of the LEZ scheme for a specified period where it is considered appropriate to do so for the purposes of a significant national **OR** local event. A suspension may also be issued in relation to a temporary diversion into the LEZ where vehicles follow the signed diversionary route.

The Scope of the LEZ Scheme

The Glasgow LEZ will apply to all vehicle types, with the exception of motorbikes and mopeds, and those vehicle types or uses considered exempt in Regulations (detailed later in this report).

Table 1 below sets out the vehicle types to which the LEZ will apply, as specified in Annex II of Directive 2007/46/EC.

Vehicle	Vehicle Category	Description
Light passenger vehicles	M1	Vehicles designed and constructed for the carriage of passengers and comprising no more than eight seats in addition to the driver's seat.
Minibus	M2	Vehicles designed and constructed for the carriage of passengers, comprising more than eight seats in addition to the driver's seat, and having a maximum mass not exceeding five tonnes.
Bus and coach	M3	Vehicles designed and constructed for the carriage of passengers, comprising more than eight seats in addition to the driver's seat, and having a maximum mass exceeding five tonnes.
Light Goods Vehicles (LCVs)	N1	Vehicles designed and constructed for the carriage of goods and having a maximum mass not exceeding 3.5 tonnes.
Heavy Goods Vehicles (HGVs)	N2	Vehicles designed and constructed for the carriage of goods and having a maximum mass exceeding 3.5 tonnes but not exceeding 12 tonnes.
	N3	Vehicles designed and constructed for the carriage of goods and having a maximum mass exceeding 12 tonnes.

Table 1: Vehicle Type Approval Categories for the Glasgow LEZ

Entry to the LEZ by the above vehicle categories will only be permitted if they meet or exceed the nationally consistent emissions standards as set out in <u>The Low Emission Zones (Emission Standards</u>,

Exemptions and Enforcement) (Scotland) Regulations 2021 and summarised in Table 2 below for compression engine (diesel) vehicles and in Table 3 below for positive ignition (petrol and gas) vehicles.

Table 2: Compression Engine (Diesel) Engine, LEZ Emission Standards

Vehicle Category	Emissions Standards	Euro category
Heavy-duty vehicles (e.g. HGVs	Euro VI	M2, M3, N2, N3
and buses / coaches		
Light passenger and light	Euro 6	M1, M2, M3, N1, N2
goods vehicles		
Special category vehicles:	Euro 6	M1, M2, M3
• an ambulance (which is not		
exempt under the		
Regulations		
a hearse		
a motor caravan		

Table 3: Positive Ignition (Petrol and Gas) Engine, LEZ Emission Standards

Vehicle Category	Emissions Standards	Euro category
Heavy-duty vehicles (e.g. HGVs	Euro IV	M2, M3, N2, N3
and buses / coaches		
Light passenger and light	Euro 4	M1, M2, N1, N2
goods vehicles		
Special category vehicles:	Euro 4	M1, M2, M3
• an ambulance (which is not		
exempt under the		
Regulations		
• a hearse		
a motor caravan		

Vehicles which have been retrofitted with a suitable emissions abatement system, such that their tailpipe emissions now meet or exceed the relevant emissions standard for their vehicle type as detailed above, will be permitted access to the LEZ. Such retrofitted vehicles must be suitably accredited by an independent scheme such as the Clean Vehicle Retrofit Accreditation Scheme (CVRAS).

Vehicles which have undergone repowering, either through the installation of a new engine or other power type, will also be permitted access to the LEZ, should the repowering result in emissions which meet or exceed the above emissions standards.

For practical purposes, it is generally the case that diesel engine vehicles registered after September 2015 and petrol vehicles registered from 2006 onwards will meet these standards. Buses, coaches and HGVs registered from January 2013 onwards will also generally meet the LEZ standards.

A vehicle checker tool is available on the <u>Low Emission Zones Scotland</u> website which can be used to check a vehicles LEZ compliance.

Exemptions and Time-Limited Exemptions

A number of vehicle types are exempted from LEZs within Scotland, as defined in <u>The Low Emission</u> <u>Zones (Emission Standards, Exemptions and Enforcement) (Scotland) Regulations 2021</u>.

Table 4: National Exemptions Applying to the Glasgow LEZ

Vehicle type or classification	Description
Emergency Vehicles	The vehicle is being driven by any person who is:
	undertaking their duty as a constable
	 providing a response to an emergency at the request of the Scottish Ambulance Service Board
	• exercising the functions of the Scottish Ambulance Service Board, the Scottish Fire and Rescue Service, Her Majesty's Coastguard or the National Crime Agency
Naval, Military or Air Force Vehicles	Vehicles being used for naval, military or air force purposes.
Historic Vehicles	• The vehicle was manufactured, or registered under the Vehicle Excise and Registration Act 1994, for the first time at least 30 years ago
	• The vehicle is no longer in production, and
	• The vehicle has been historically preserved or maintained in its original state and has not undergone substantial changes in the technical characteristics of its main components.
Vehicles for Disabled Persons*	• the vehicle is being driven by any person who is in receipt of a badge (a blue badge) that has been issued under section 21(2) of the Chronically Sick and Disabled Persons Act 1970,
	• a passenger in the vehicle has been issued with a badge under that section of that Act, or
	• a badge for the vehicle has been issued under section 21(4) of that Act,
	 a reduction in annual rate of vehicle excise duty applies because the vehicle is being used by a disabled person in receipt of personal independence payment at the standard rate, or
	• Vehicles registered with a 'disabled' or 'disabled passenger vehicles' tax class e.g. the vehicle is exempt from payment of vehicle excise duty under paragraph 19(1) or 20(1) of schedule 2 of the Vehicle Excise and Registration Act 1994 (exemptions from excise duty for vehicles used by disabled persons).
Showman Vehicles	 Vehicles described as either "showman's goods vehicle" or "showman's vehicle" according to section 62(1) of the Vehicle Excise and Registration Act 1994. Note: these are highly specialised vehicles used for the purposes of travelling showmen, where the vehicle is used during the performance, used for the purpose of providing the performance or used for carrying performance equipment

*Note: blue badges are assigned to a person, not a vehicle, so a blue badge holder could travel in any vehicle and the rules of the blue badge would need to be applied to that vehicle on that day of travel.

The Transport (Scotland) Act 2019 allows local authorities to grant non-compliant vehicles or vehicle types a time limited extension which would permit them to operate within a LEZ. These extensions are limited to a maximum of one year but may be renewed by the local authority. Glasgow City Council does not propose a general exemption of this type for any particular vehicles or vehicle types.

The LEZ scheme will allow for applications for a time limited exemption under circumstances where entry of a non-compliant vehicle is required for a specific, defined purpose not considered in legislation or Regulations. Applications will be determined on their individual merits. Examples of this may be, but are not limited to; abnormal loads or machinery transport, historic vehicles or vehicles of particular speciality not covered by other exemptions and used for a specific purpose, or any other non-compliant vehicle use deemed appropriate on application to Glasgow City Council.

Applications for time limited exemptions will **NOT** be considered for the routine transport of people or goods or for routine commercial operations. It is expected that these exemptions will only be granted in rare circumstances.

Penalty Charges for Non-Compliant Vehicles

Penalty charges for non-compliant vehicle entry into a LEZ in Scotland are set at a national level as seen in <u>The Low Emission Zones (Emission Standards, Exemptions and Enforcement) (Scotland)</u> <u>Regulations 2021</u>.

The initial penalty charge is set at £60 and is reduced by 50% if paid within 14 days. Where repeat entry by the same vehicle is detected within a 90 day period, this penalty charge rate will double, doubling again on each subsequent entry up to a maximum determined by vehicle type. Where no subsequent entry by a non-compliant vehicle is detected within a 90 day period, the penalty charge is reset to the initial penalty charge rate of £60. Full details of the applicable penalty charges are shown in Table 5 below.

Vehicle Category	Initial penalty charge	Subsequent penalty charges			
	1	2	3	4	5
Light passenger vehicle	£60	£120	£240	£480	-
Minibus	£60	£120	£240	£480	£960
Bus and Coach	£60	£120	£240	£480	£960
Light goods vehicle	£60	£120	£240	£480	-
Heavy goods vehicle	£60	£120	£240	£480	£960
Special Purpose Vehicle (SPV)	£60	£120	£240	£480	-

Further Information and Support

Further information on air quality in Glasgow can be found on the <u>Glasgow Air Quality website</u>, including annual reports and action plans.

Funding support is available, subject to eligibility, from the <u>Low Emission Zones website</u>. This includes:

- Disposal grants A means tested grant for households and micro businesses to receive funding for disposal of non-compliant vehicles and mobility grants for sustainable or public transport.
- Retrofit grants A grant for micro businesses to improve emissions from non-compliant vehicles through the fitting of an approved retrofit solution. This grant is available for Light Commercial Vehicles, Taxis and Heavy Goods Vehicles.

The above grants are provided by Transport Scotland and administered by the Energy Savings Trust.

Representation and Next Steps

Further information on the proposed LEZ, and all supporting information, can be found on the Glasgow City Council LEZ website.

Proposals can be viewed:

- Online at: https://www.glasgow.gov.uk/LEZ or
- By appointment only between 10:00 16:00, Monday to Friday at the address listed below (please call 0141 287 6628).

The Council will accept any formal objections to the proposed LEZ between 9th December 2021 and 20th January 2022. Objections must be made in writing, stating the grounds of the objection, and can be submitted via:

- Email: to <u>LEZ@glasgow.gov.uk</u>; or
- Letter: to LEZ

Sustainable Glasgow Neighbourhoods, Regeneration and Sustainability Glasgow City Council 231 George St Glasgow G1 1RX

Glasgow City Council will consider all objections received within the period stated above and will publish a report detailing the number of objections received, a summary of the general nature of the objections received and our response to these objections.
