

IMPORTANT NOTICE

Making Glasgow a cleaner, greener and safer city

Your guide to the new trade waste procedures

Glasgow
CITY COUNCIL

We're changing our trade waste procedures to help Glasgow become a cleaner, greener and safer city.

This means trade waste containers (bins, bags and recycling) will need to be:

- stored inside the business premises, instead of on the street; and
- put out for collection only during pre-arranged time slots.

The changes will help businesses to comply with the Environmental Protection Act (1990) and the Waste (Scotland) Regulations (2012).

Further information

Please read the enclosed letter for further information.

Please contact your trade waste supplier to discuss the changes and how they will affect you. There is also information available on our website, including advice, support and details of the changes:

<https://www.glasgowcitycentrestrategy.com/project/commercial-waste>

This will affect all businesses that store or put their waste out for collection on roads, including pavements or lanes.

This is Phase Two of a city-wide initiative. You must be compliant by 1st April 2018
