Affordable Sector with Residential Potential (capacity greater than 3 units)	81
SITE SCHEDULES - SMALL SITES (capacity less than 4 units): categories as above, where applicable	106
MAPS	129
APPENDIX – Recent House Completions (2013-2018) excluding sites with a capacity of less than 4 units ...	163

INTRODUCTION

- 1 The Housing Land Audit 2018 identifies all potential housing sites in the City at 31 March and estimates future completions from this supply over the following seven years (1 April 2018 to 31 March 2025). In addition to new build sites, the supply also includes conversions from non-residential use and rehabilitation of existing stock involving a change of tenure.
- 2 The schedules of sites are categorised by tenure and planning status (see below for definitions) with the unique site reference number used to order sites within each category. This format has been agreed by all Councils in the Glasgow and Clyde Valley Area, and provides a consistent approach that facilitates analysis across the Glasgow and the Clyde Valley Strategic Development Plan area. By convention, small sites, i.e. less than 4 dwellings, are excluded from the Glasgow & Clyde Valley wide view of housing land supply (the Established Land Supply). The City Council, however, monitors small sites and they are included in this document in a separate set of schedules.
- 3 Notes on the data provided in the site schedules are provided in Section B. Section C provides more detailed Additional Notes on specific issues, i.e. Tenure, Site Capacity, Established Land Supply, Effective Land Supply, Programmed Output and House Types.
- 4 A4 Maps have been included to show all sites in the land supply, including small sites (1-3 houses). The maps are 1:12,000 scale with 1:6,000 scale insets where greater detail is required. The map index sheet shows the map coverage and the reference number for each A4 map.

- 5 Section D contains a set of tables summarising the land supply position at 31 March 2018 (Tables 1-7) and past house-building rates (Tables 8-14). An additional schedule of 'Recent Housing Completions' is included in an Appendix. It lists all sites on which houses have been completed within the last five years (1 April 2013 – 31 March 2018).
- 6 If you have any queries regarding this document, please contact:

Alistair Doig 0141-287-8656 (alistair.doig@glasgow.gov.uk)
Chris McNey 0141-287-9246 (chris.mcney@glasgow.gov.uk)

Development and Regeneration Services
Glasgow City Council
231 George Street
Glasgow, G1 1RX

Note: The inclusion of sites in the supply does not necessarily infer site availability and only contact with individual owners may ascertain this. If planning permission does not already exist for a particular site, inclusion in the supply does not pre-empt any decision of the City Council in relation to the principle of housing development.

HOUSING LAND AUDIT - 31 MARCH 2018

(A) TENURE AND PLANNING STATUS DEFINITIONS

The **TENURE** categories used are:

- (i) **Private Sector** Dwellings built for owner occupation or private rent. (see Additional Note 1)
- (ii) **Affordable Sector** Dwellings built for Social Rent, Mid-Market Rent, Shared Ownership and Shared Equity

The **PLANNING STATUS** categories used are:

- (i) **Under Construction** Sites under construction at 31 March 2018.
- (ii) **Consents** Sites with outline/ planning permission in principle or detailed planning consent at 31 March 2018.
- (iii) **Residential Potential** This category includes a wide variety of sites not covered by the above categories, including (a) sites being promoted for housing by the City Council, and (b) other sites that are recognised by the City Council as having residential potential.
- (iv) **Greenfield Release** Greenfield sites identified to meet Structure Plan or Strategic Development Plan additional land requirements, but which do not have planning consent at 31 March 2018.

HOUSING LAND AUDIT - 31 MARCH 2018

(B) SITE SCHEDULES – Notes and Definitions

Site Ref	Unique sequential reference number for each site. Sites that have been split into a number of separate sites (e.g. separate phases within a site or mixed tenure developments) have the suffix 'A', 'B', etc.
Map	Reference number of A4 map.
Grid Ref	Ordnance Survey grid reference.
Ward	Council ward site is located in.
Address	Specific site address (where possible street names are used).
Builder	Refers to the developer of the site (if known). In the social rented sector, the housing association that will own and manage the stock is shown.
Owner	Sites which are thought to be privately owned are identified as "private" and those which are in public ownership are subdivided into the following categories : GCC, GHA, HA and OP(other public). The information on ownership is obtained from a number of sources including planning applications and council reports. The accuracy of this information cannot be guaranteed given (a) uncertainty or dispute over ownership on some sites, and (b) the difficulty in monitoring ownership changes.

Area (ha)	The area of the site in hectares.
Capacity	The total capacity of the site expressed as number of dwellings (see Technical Note 2).
Dev Type	Refers to both the type of development and type of site:
NB-B	New Build on a Brownfield site
NB-G	New Build on a Greenfield site
NB-M	New Build on a Mixed Brownfield / Greenfield site
CONV	Conversion of building from other uses to housing.
REFURB	Refurbishment of stock involving a change of tenure.

The suffix **-U** (urban) or **-NU** (non-urban) refers to whether the site is located inside or outside the built-up area.

HOUSING LAND AUDIT - 31 MARCH 2018

SITE SCHEDULES – Notes and Definitions (continued)

Tenure	O/O	Owner Occupied
	S/E	Shared Equity
	S/O	Shared Ownership
	P/R	Private Rented
	S/R	Social Rented
	MMRS	Mid-Market Rent by RSL
	MMRP	Mid-Market Rent by private developer

Fund Prog Refers to sites identified in the current development funding programmes:
 GCC – RSL (Registered Social Landlord) development funding programmes administered by the City Council, including shared equity and shared ownership development.
 GHA – Glasgow Housing Association's new build programme.
 Gov – Scottish Government's Innovation & Investment Fund

Sub-Market Refers to the housing sub-market area in which the (private sector) site is located. These areas form part of the wider housing market area system (developed for the Structure Plan and included within the Strategic Development Plan) within which private sector supply and demand is compared :

- GGNW - Greater Glasgow North & West
- SGNE - Strathkelvin & Glasgow North East
- GE - Glasgow East
- GGS - Greater Glasgow South

PA Status This field provides additional information on the status of the site. For those sites with planning consent, it identifies whether it is outline/ planning permission in principle or detailed consent. For potential sites it indicates where a planning application has been submitted or granted subject to Section 69 or 75 agreement being signed (as at 31 March 2018).

Established An entry in this field shows that the site is part of the private sector Established Land Supply. The year indicates that the site has been continuously considered part of the Established Land Supply since then. (see Additional Note 3)

Effective An entry in this field shows that the site is part of the Established Land Supply which is Effective, i.e. that development is anticipated on the site over the next seven years. The year indicates that the site has been continuously considered part of the Effective Land Supply since that date. (see Additional Note 4)

HOUSING LAND AUDIT - 31 MARCH 2018

SITE SCHEDULES – Notes and Definitions (continued)

SPGR	Indicates a greenfield site released to meet Structure Plan or Strategic Development Plan additional land supply requirements. The date refers to the publication year of the relevant Structure Plan or Strategic Development Plan.
Built	Indicates the number of dwellings built and occupied each year over the previous three years. Sites that have been under construction for longer than this will have the sum of earlier completions in the Pre 15 column.
Total Built	Indicates the total number of dwellings <u>built and occupied</u> at 31 March 2018.
Rem Cap	The remaining capacity of the site, i.e. dwellings not yet started, dwellings under construction and dwellings built but not yet occupied at 31 March 2018.
Flats	Indicates the number of flats to be developed on each site. (see Additional Note 6) 'Est' indicates where this figure is an estimate.

The remaining fields are relevant only to sites in the Established Land Supply, i.e. excluding sites with a capacity of less than 4 units. Note that, because of uncertainty about tenure, sites in the 'Tenure Not Specified' category are treated as non-effective. The methodology used in programming sites is described in Additional Note 5.

Programming Anticipated completions by year over the next seven years (1 April 2018 to 31 March 2025).

Total 18-25 Total programmed output for the next seven years.

Post 2025 Indicates the residual capacity not included in the total programmed output. The main reasons for capacity being included in the Post 2025 column are:

- (a) The site may have a long lead-in time or a slow development rate so that only part can be programmed within the next seven years.
- (b) The site may be part of a major development area that is phased, with not all phases producing output during the next seven years.
- (c) The site may suffer from constraints that preclude development during the next seven years despite the site continuing to have residential potential. These sites are considered to be non-effective.

(C) ADDITIONAL NOTES

1 TENURE – Private Sector

The land supply will continue to differentiate between sites for owner-occupation and private rental where possible, although, in one critical respect, the differentiation is not important. Private sector housing demand estimates for both the Strategic Development Plans 2011 & 2018 encompass both the owner-occupied and private rented sectors. Accordingly, all sites for private renting, owner-occupation, or a mixture of both, are relevant in meeting that demand.

2 SITE CAPACITY

The site capacity figures used are the most realistic assessments available. These are taken from planning consents, planning applications or other known proposals. In the absence of such information, a notional capacity based on housing density is applied. The *City Development Plan, SG1, Placemaking (Part 2): Residential Density* specifies a range of housing densities according to location and accessibility to public transport. For the purposes of estimating capacity, however, these ranges are replaced by a single density figure for each category, as follows:

Location	Public Transport Accessibility	Notional Density (houses per hectare)
City Centre	High or Base	100
Inner Urban	High	100
Inner Urban	Base or Below Base	50
Outer Urban	High	30
Outer Urban	Base or Below Base	30
Non Urban	All	20

The particular notional densities used have been chosen to ensure that the overall capacity of the land supply is not over-estimated. On average, the application of the above densities will tend to under-estimate capacity.

Note: The capacity of a housing site may change over time. The inclusion of an estimated figure in this document does not imply that the capacity is acceptable to the Council. That can only be established by planning consent.

(C) ADDITIONAL NOTES (continued)

3 ESTABLISHED LAND SUPPLY

All sites with a total capacity of four or more dwellings, collectively make up the established land supply (ELS). The ELS comprises the remaining capacity on sites under construction, sites with planning consent, and other land and buildings that are recognised as having potential for housing development.

4 EFFECTIVE LAND SUPPLY

This housing land audit has been prepared in line with the timescales set out in Scottish Planning Policy (June 2014). It requires the Strategic Development Plan (SDP) to identify sites that are capable of development by the end of year 7, building in up to 2 years to allow for the adoption of Local Development Plans following the approval of the SDP.

The assessment of site effectiveness has been undertaken by applying the criteria below from Planning Advice Note 2/2010 Affordable Housing and Housing Land Audits (August 2010).

- **ownership** : the site is in the ownership or control of a party which can be expected to develop it or release it for development. Where a site is in the ownership of a local authority or other public body, it should be included only where it is part of a programme of land disposal;

- **physical** : the site, or relevant part of it, is free from constraints related to slope, aspect, flood risk, ground stability or vehicular access which would preclude its development. Where there is a solid commitment to removing the constraints in time to allow development in the period under consideration, or the market is strong enough to fund the remedial work required, the site should be included in the effective supply;
- **contamination** : previous use has not resulted in contamination of the site or, if it has, commitments have been made which would allow it to be developed to provide marketable housing;
- **deficit funding** : any public funding required to make residential development economically viable is committed by the public bodies concerned;
- **marketability** : the site, or relevant part of it, can be developed in the period under consideration;
- **infrastructure** : the site is either free of infrastructure constraints, or any required infrastructure can be provided realistically by the developer or another party to allow development and
- **land use** : housing is the sole preferred land use of the land in planning terms, or if housing is one of a range of possible uses other factors such as ownership and marketability point to housing becoming a realistic option.

(C) ADDITIONAL NOTES (continued)

5 PROGRAMMED OUTPUT

Estimated start-dates for effective sites are based on:

- (a) development lead-in times, including the estimated time taken to overcome constraints and gain all the necessary permissions;
- (b) availability of funding, if required; and
- (c) development of other sites in the locality.

The annual programmed output from each of the effective sites in the private sector over the 7-year period is estimated taking into account a variety of factors including those listed below. These factors are not a consideration in the affordable sector.

- (a) site location;
- (b) developer involved;
- (c) type and price of dwelling;
- (d) past performance; and
- (e) competition between sites.

Due to the greater uncertainty in estimating output for sites in the private sector of less than 10 houses that have not yet started, a convention has been established whereby these sites are grouped together and only 50% of their total capacity is included in the total programmed output. The 50% rule is based on an assessment of past trends in the proportion of such sites that have been built.

Mixed tenure sites are sub-divided by tenure and this often results in a site of less than 10 shared ownership or shared equity units. For these sites, programming is related to the whole development site, and the 50% rule is not applied.

6 EFFECTIVENESS AND PROGRAMMING – Current Market Conditions

Current housing market conditions (with constrained demand and/or reduced capacity in the development industry) have had a significant impact on judgements about the programming of private housing developments. Based on an assumption of gradual recovery in the market, the anticipated site starts for a significant number of sites have been delayed. This has resulted in a reduced effective supply in comparison with previous audits.

7 HOUSE TYPES – Private Sector

Information on the total number of flats on each site is included in the land supply schedules. Further work has been carried out to identify the balance between flatted and non-flatted development in relation to the 2018-25 programmed output. Although it has not been possible to include this information in the individual site schedules, Table 6 summarises the position by Ward.

The monitoring of house type information for past completions in the private sector is further refined by separately identifying detached, semi-detached and terraced housing. Table 12 summarises the position in the City for the last ten years.
