# INTRODUCTION

- 1 The Housing Land Audit 2021 identifies all potential housing sites in the City at 31 March and estimates future completions from this supply over the following seven years (1 April 2021 to 31 March 2028). In addition to new build sites, the supply also includes conversions from non-residential use and rehabilitation of existing stock involving a change of tenure.
- 2 The schedules of sites are categorised by tenure and planning status (see below for definitions) with the unique site reference number used to order sites within each category. This format has been agreed by all Councils in the Glasgow and Clyde Valley area, and provides a consistent approach that facilitates analysis across the Clydeplan Strategic Development Plan area. By convention, small sites, i.e. less than 4 dwellings, are excluded from the Clydeplan-wide view of housing land supply (the Established Land Supply). The City Council, however, monitors small sites and they are included in this document in a separate set of schedules.
- 3 Notes on the data provided in the site schedules are provided in Section B. Section C provides more detailed Additional Notes on specific issues, i.e. Tenure, Site Capacity, Established Land Supply, Effective Land Supply, Programmed Output and House Types.
- 4 A4 Maps have been included to show all sites in the land supply, including small sites (1-3 houses). The maps are 1:12,000 scale with 1:6,000 scale insets where greater detail is required. The map index sheet shows the map coverage and the reference number for each A4 map.

- 5 Section D contains a set of tables summarising the land supply position at 31 March 2021 (Tables 1-7) and past house-building rates (Tables 8-14). An additional schedule of 'Recent Housing Completions' is included in an Appendix. It lists all sites on which houses have been completed within the last five years (1 April 2016 31 March 2021).
- 6 If you have any queries regarding this document, please contact:

#### Chris McNey

DevelopmentPlan@glasgow.gov.uk.

**Note**: The inclusion of sites in the supply does not necessarily infer site availability and only contact with individual owners may ascertain this. If planning permission does not already exist for a particular site, inclusion in the supply does not pre-empt any decision of the City Council in relation to the principle of housing development.

Link to interactive map of Housing Sites @ March 2021

# (A) TENURE AND PLANNING STATUS DEFINITIONS

#### The **TENURE** categories used are:

- (i) **Private Sector** Dwellings built for owner occupation or private rent. (see Additional Note 1)
- (ii) Affordable Sector Dwellings built for Social Rent, Mid-Market Rent, Shared Ownership and Shared Equity

# The PLANNING STATUS categories used are:

| (i) Under Construction      | Sites under construction at 31 March 2021.  |
|-----------------------------|---|
| (ii) Consents               | Sites with outline/ planning permission in principle or detailed planning consent at 31 March 2021.   |
| (iii) Residential Potential | This category includes a wide variety of sites<br>not covered by the above categories, including<br>(a) sites being promoted for housing by the City<br>Council, and (b) other sites that are recognised<br>by the City Council as having residential<br>potential. |
| (iv) Greenfield Release     | Greenfield sites identified to meet Structure<br>Plan or Strategic Development Plan additional<br>land requirements, but which do not have<br>planning consent at 31 March 2021.  |

#### (B) SITE SCHEDULES – Notes and Definitions

- Site Ref Unique sequential reference number for each site. Sites that have been split into a number of separate sites (e.g. separate phases within a site or mixed tenure developments) have the suffix 'A', 'B', etc. these may on occasion share the same geography.
- Map Reference number of A4 map.
- Grid Ref Ordnance Survey grid reference.
- Ward Council ward site is located in.
- Address Specific site address (where possible street names are used).
- Builder Refers to the developer of the site (if known). In the social rented sector, the housing association that will own and manage the stock is generally shown.
- Owner Sites which appear to be in public ownership are subdivided into the following categories: Glasgow City Council (GCC), Glasgow Housing Association (GHA), Housing Association (HA) and "Other Public" (OP) for example, Scottish Enterprise or Network Rail would be considered 'other public'. All other sites are assumed to be privately owned and are identified as "private" based on information provided to the Planning Authority. The Land Registry should be contacted for specific details of ownership.

#### Area (ha) The area of the site in hectares.

| Capacity |                | pacity of the site expressed as number of e Technical Note 2). |
|----------|----------------|--|
| Dev Type | Refers to both | n the type of development and type of site:                    |
|          | NB-B           | New Build on a Brownfield site                                 |
|          | NB-G           | New Build on a Greenfield site                                 |
|          | CONV           | <b>Conv</b> ersion of building from other uses to housing.     |
|          | REFURB         | Refurbishment of stock involving a change of tenure.           |
|          | The suffix -II | (urban) or -NUL (non-urban) refers to whether                  |

The suffix **-U** (urban) or **-NU** (non-urban) refers to whether the site is located inside or outside the built-up area.

| SITE SCHEDU | JLES – Notes             | s and Definitions (continued)  | Sub-Market  | Refers to the market tenure housing sub-market area in which the site is located. These areas are often shared with  |
|-------------|--------------------------|--|-------------|--|
| Tenure      | O/O<br>P/R<br>Taken toge | Owner Occupied<br>Private Rented<br>ether O/O and P/R tenure are considered Market   |             | neighbouring Local Authorities and form part of the housing<br>market area system (developed for the Structure Plan and<br>included within the Strategic Development Plan) within<br>which market tenure supply and demand functions.                                  |
|             | S/E<br>S/O<br>S/R        | Shared Equity<br>Shared Ownership<br>Social Rented   |             | GE Glasgow East<br>GGNW Greater Glasgow North & West<br>GGS Greater Glasgow South<br>SGNE Strathkelvin & Greater Glasgow North East  |
|             | MMRS<br>MMRP             | Mid-Market Rent by RSL<br>Mid-Market Rent by private developer   | PA Status   | This field provides additional information on the status of the site. For those sites with planning consent, it identifies   |
|             | considered               | gether S/E, S/O, S/R, MMRS, MMRP are<br>I Affordable Tenure  |             | whether it is outline/ planning permission in principle or<br>detailed consent. For potential sites it indicates where a<br>planning application has been submitted or granted subject<br>to Section 60 or 75 percent being signed (as at 21 March                     |
| Fund Prog   | Refers to s<br>programme | ites identified in the current development funding es:   |             | to Section 69 or 75 agreement being signed (as at 31 March 2021).  |
|             | GCC-RSL<br>GHA           | Funding programmes administered by the City<br>Council, including for shared equity and<br>shared ownership developments.<br>Glasgow Housing Association's new build | Established | An entry in this field shows that the site is part of the Established Land Supply. The year indicates that the site has been <u>continuously</u> considered part of the Established Land Supply since then. (see Additional Note 3)                                    |
|             | Gov                      | programme.<br>Scottish Government's Innovation &<br>Investment Fund  | Effective   | An entry in this field means the site is considered Effective, i.e. that development is anticipated on the site over the next seven years. The year indicates that the site has been <u>continuously</u> considered Effective since that date. (see Additional Note 4) |

#### SITE SCHEDULES – Notes and Definitions (continued)

- **SPGR** Indicates a greenfield site released to meet Structure Plan or Strategic Development Plan additional land supply requirements. The date refers to the publication year of the relevant Structure Plan or Strategic Development Plan.
- Built Indicates the number of dwellings built and occupied each year over the previous three years. Sites that have been under construction for longer than this will have the sum of earlier completions in the Pre 18 column.
- Total Built
   Indicates the total number of dwellings complete and occupied at 31 March 2021.
- **Rem Cap** The remaining capacity of the site, i.e. dwellings not yet started, dwellings under construction and dwellings built but not yet occupied at 31 March 2021.
- Flats Indicates the number of flats to be developed on each site. (see Additional Note 6) 'Est' indicates where this figure is an estimate.

The remaining fields are relevant only to sites in the Established Land Supply, i.e. excluding sites with a capacity of less than 4 units. Note that, because of uncertainty about tenure, sites in the 'Tenure Not Specified' category are treated as non-effective. The methodology used in programming sites is described in Additional Note 5.

| Programming | Anticipated completions by year over the next seven years (1 April 2021 to 31 March 2028).   |
|-------------|--|
| Total 21-28 | Total programmed output for the next seven years.  |
| Post 2028   | Indicates the residual capacity not included in the total programmed output. The main reasons for capacity being included in the Post 2028 column are: |
|             | (a) The site may be anticipated to have a slow   |

(a) The site may be anticipated to have a slow development rate or a long lead-in time so that only part of its potential capacity for new homes is expected to be realised within the next seven years.

(b) The site may be large and anticipated to be subdivided at a later stage, with not all phases producing output during the next seven years.

(c) The site may be subject to constraints that currently make the delivery of the development during the next seven years unlikely. These sites are considered to be <u>non-effective</u> but can contribute in time.

# (C) ADDITIONAL NOTES

#### 1 TENURE – Private Sector

The land supply differentiates between sites for owner-occupation and private rental where possible, although they are both considered market tenure homes for the purposes of assessment against the Strategic Development Plan. Where tenure is not specified the default is assumed to be owner-occupation tenure.

#### 2 SITE CAPACITY

The site capacity figures used are the most realistic assessments available. These are taken from planning consents, planning applications or other known proposals. In the absence of such information, a notional capacity based on housing density is applied. The *City Development Plan, SG1, Placemaking (Part 2): Residential Density* specifies a range of housing densities according to location and accessibility to public transport. For the purposes of estimating capacity, however, these ranges are replaced by a single density figure for each category, as follows:

| Location    | Public Transport<br>Accessibility | Notional Density<br>(houses per hectare) |
|-------------|-----------------------------------|--|
| City Centre | High or Base                      | 100                                      |
| Inner Urban | High                              | 100                                      |
| Inner Urban | Base or Below Base                | 50                                       |
| Outer Urban | High                              | 30                                       |
| Outer Urban | Base or Below Base                | 30                                       |
| Non Urban   | All                               | 20                                       |

The particular notional densities used have been chosen to ensure that the overall capacity of the land supply is not over-estimated. Previous analysis has shown that the application of the above densities will tend to under-estimate capacity.

Note: The capacity of a housing site may change over time. The inclusion of an estimated figure in this document does not imply that the capacity is acceptable to the Council. That can only be established by planning consent.

# (C) ADDITIONAL NOTES (continued)

# 3 ESTABLISHED LAND SUPPLY

All sites with a total capacity of four or more dwellings, collectively make up the established land supply (ELS). The ELS comprises the remaining capacity on sites under construction, sites with planning consent, and other land and buildings that are recognised as having potential for housing development.

# 4 EFFECTIVE LAND SUPPLY

This housing land audit has been prepared in line with the timescales set out in Scottish Planning Policy (June 2014). It requires the Strategic Development Plan (SDP) to identify sites that are capable of development by the end of year 7, building in up to 2 years to allow for the adoption of Local Development Plans following the approval of the SDP.

The assessment of site effectiveness has been undertaken by applying the criteria below from <u>Planning Advice Note 2/2010 Affordable Housing and Housing Land</u> Audits (August 2010).

• **ownership** : the site is in the ownership or control of a party which can be expected to develop it or release it for development. Where a site is in the ownership of a local authority or other public body, it should be included only where it is part of a programme of land disposal;

- physical : the site, or relevant part of it, is free from constraints related to slope, aspect, flood risk, ground stability or vehicular access which would preclude its development. Where there is a solid commitment to removing the constraints in time to allow development in the period under consideration, or the market is strong enough to fund the remedial work required, the site should be included in the effective supply;
- contamination : previous use has not resulted in contamination of the site or, if it has, commitments have been made which would allow it to be developed to provide marketable housing;
- **deficit funding** : any public funding required to make residential development economically viable is committed by the public bodies concerned;
- **marketability** : the site, or relevant part of it, can be developed in the period under consideration;
- **infrastructure** : the site is either free of infrastructure constraints, or any required infrastructure can be provided realistically by the developer or another party to allow development and
- **land use** : housing is the sole preferred land use of the land in planning terms, or if housing is one of a range of possible uses other factors such as ownership and marketability point to housing becoming a realistic option.

# (C) ADDITIONAL NOTES (continued)

#### 5 PROGRAMMED OUTPUT

Estimated start-dates for effective sites are based on:

- (a) development lead-in times, including the estimated time taken to overcome constraints and gain all the necessary permissions;
- (b) availability of funding, if required; and
- (c) development of other sites in the locality.

The annual programmed output from each of the effective sites in the private sector over the 7-year period is estimated taking into account a variety of factors including those listed below. These factors are not a consideration in the affordable sector.

- (a) site location;
- (b) developer involved;
- (c) type and price of dwelling;
- (d) past performance; and
- (e) competition between sites.

Due to the greater uncertainty in estimating output for sites in the private sector of less than 10 houses that have not yet started, a convention has been established whereby these sites are generally grouped together and only 50% of their total capacity is included in the total programmed output. The 50% rule is based on an assessment of past trends in the proportion of such sites that have been built.

Mixed tenure sites are sub-divided by tenure and this often results in a site of less than 10 shared ownership or shared equity units. For these sites, programming is related to the whole development site, and the 50% rule is not applied.

#### 6 EFFECTIVENESS AND PROGRAMMING – Current Market Conditions

This year's Audit covered the first year of the COVID-19 pandemic. The housebuilding industry in Scotland, like most sectors, was adversely impacted by the extraordinary measures introduced to curb its spread.

Understandably the combination of the global issues has resulted in a considerable drop in completions for the period 1 April 2020 to 31 March 2021 in Glasgow.

The first lockdown began in March 2020 (just before the audit period) and impacted on all housing developments, effectively halting all progress on active sites as well as delaying site starts for several months. A second national lockdown began in January 2021 and also impacted the sector during this latter part of this audit year.

In addition, this is the first Audit period where the UK was no longer part of the EU. It is currently difficult to extricate Brexit impacts from the pandemic impacts but anecdotal feedback suggests higher house prices, resource costs and fewer skilled workers can be attributed to this legislative change.

It appears likely that some of the suppressing impact of these global issues will linger through the period 2021 to 2022 but a general assumption expressed by stakeholders was that lockdowns (if necessary) will become less common and disruptive, and that the industry will adapt and recover quickly.

Despite the global context, stakeholders remain positive about the outlook in Glasgow and have continued to advise on the fundamental effectiveness of the land supply. They advised on the effectiveness of 18 new sites accounting for 762 homes added to the established supply and as part of a refining of the land supply, they played a crucial role in the deletion of 78 records accounting for 1,874 homes this year.

This has been a difficult time for the housebuilding industry, and the Development Plan team appreciate, and acknowledge, the key role and co-operation of stakeholders in delivering the Audit.

# 7 HOUSE TYPES – Private Sector

Information on the total number of flats on each site is included in the site schedules.

Table 6 summarises the balance between flatted and other house-types by Ward.

Table 12 summarises the past completions by flats, detached, semi-detached and terraced housing for the last ten years.

|                                | 2021        |         |         |         |         |         |         |         | 2021-2028   |               |
