Glasgow G1 1RX

SITES AVAILABLE FOR INDUSTRIAL OR BUSINESS DEVELOPMENTS

1. INTRODUCTION

This document lists sites identified as having potential for industrial or business use within Economic Development Areas (as defined by the City Development Plan). It includes mainly sites greater than 0.4 of a hectare (1 acre) although some smaller sites are included particularly where the site is being actively marketed or has planning permission. It does not include sites within the City Centre which contains opportunities for a range of uses. The sites have been categorised in terms of availability/ suitability (see below).

2. SITE CATEGORISATION

In order to ensure consistency with Clydeplan Strategic Development Plan and neighbouring Planning Authorities the sites have been categorised as follows:-

A: LAND AVAILABLE FOR INDUSTRY AND BUSINESS PURPOSES

In essence this category consists of sites where land is currently available for development and was formerly identified as:-

CONFIRMED MARKETABLE - sites with no known servicing issues that are in regionally accessible locations and which are therefore considered readily available and marketable;

POTENTIAL MARKETABLE - sites in regionally accessible locations that require promotion, appearance, servicing or ownership improvements. These sites are considered potentially marketable and serviceable.

REMAIN IN INDUSTRY - sites in established industrial areas for which there is likely to be local demand.

B: SPECIALISED SITES

Sites with unique circumstance or specific locational need.

C: LAND IN USE FOR INDUSTRIAL/BUSINESS PURPOSES BUT WITHOUT PHYSICAL DEVELOPMENT

Sites that are in use but without any physical development or buildings associated with the use, most normally for storage of materials that can relatively quickly be cleared from the site to allow for its re-development. The land therefore has the potential to become readily available for industrial development should the current use cease.

D: REVIEW TO OTHER USE

Sites that have previously been identified as 'Land Available for Industry and Business Purposes' but which have subsequently been identified, but not yet developed, for an alternative use – most normally via planning permission. They therefore potentially remain available for industrial and business use.

Note: All sites are considered available for industrial and business uses but categories B, C and D are useful for monitoring purposes as they acknowledge characteristics which may impact the eventual development of the site for industrial and business purposes such as having a specific purpose, being in undeveloped use already, and anticipating a competing use.

3. MAPS

The online mapping application can be used to view the locations of the industrial land supply [here](#):

The map application allows for searches by address or by site reference. For example, to find a site please click the small arrow to the left of the search box and select Industrial/Business Land Supply 2022, then enter the site reference shown in the following tables.
