# 1 Introduction

## Background

The verification performance report is a strategic planning and management tool that provides information about the local authority building standards service, communicates the vision and strategy, and sets out performance against strategic goals and targets.

Building standards verifiers in Scotland are required to utilise the performance report to manage, monitor, review and develop strategies for their business, and should focus on the performance framework's core perspectives and cross-cutting themes.

## About Glasgow

Glasgow is Scotland's largest city, with over 621,000 citizens covering an area of almost 17,500 hectares. It is a city with a great history and heritage built around the River Clyde. We are the centre of the only metropolitan region in Scotland and are the most ethnically diverse city in the country.

Generating an impressive £19.9 billion Gross Value Added (GVA) for the national economy in 2019, Glasgow has experienced economic growth and development in recent years, bolstered by careful planning, a growing and young population, and business growth in high-tech and service sectors. Glasgow has the second fastest growing level of productivity of the UK's core cities.

Glasgow is actively attracting the right mix of business, productivity, innovation and investment to the city. Supported by initiatives such as the Glasgow City Region City Deal, the city is building on its excellent infrastructure to be one of the most diverse and forward-thinking cities in Europe. The city is home to an impressive 'who's who' of blue-chip companies, major global organisations and international Small and Medium Enterprises (SME). It is the UK's third largest financial centre and ranks in the top 50 in the world. Some of the biggest names in global business and finance, international leaders in precision medicine and pharmaceuticals, research services, engineering and an impressive range of global brands call Glasgow home. In the last 5 years, the number of enterprises in Glasgow has increased by approximately 25.9%, a larger percentage increase than both that of Scotland and the UK.

The strength of Glasgow's economy is its diversity with a range of sectors and sub-sectors which generate over 16% of the countries jobs. The main employment sectors are:

Engineering, Design and Manufacturing	Life Sciences	Creative Industries & Digital Technology
Financial and Business Services	Tourism and Events	Retail
Low Carbon Industries	Higher and Further Education	Health & Public Services

Clusters of expertise have formed around life sciences and low carbon thanks to the Glasgow Bio-Corridor and the International Technology Renewable Energy Zone. The International Financial Services District in central Glasgow hosts several global financial services companies in addition to superb office accommodation. Glasgow maintains a robust skills pipeline and a talented, multilingual workforce. The city is home to 185,000 students from 140 countries across five higher education institutions and three super colleges. The city's institutions of higher and further education graduate around 20,000 individuals per annum ensuring a healthy talent pipeline.

### **Building Standards & Public Safety 2021/22**

Glasgow City Council was appointed by Scottish Ministers as the sole verifier for Glasgow. The verification function is performed by Building Standards & Public Safety on behalf of the Council. The full range of verification and non-verification services provided are detailed in section 2 of this report.

Since April 2010, Building Standards & Public Safety has been part of an integrated Planning & Building Standards service (PBS) initially within Development & Regeneration Services (DRS) and from 1<sup>st</sup> April 2021 within Neighbourhoods, Regeneration & Sustainability as Planning, Housing, Building Standards & Transport Strategy. NRS sits within the corporate structure shown below and has been identified as the lead service in delivering the city's first priority; economic growth and is one of seven key services providing core Council services.

As set-out by the [Glasgow Economic Strategy](#), the city is building on this success with the ambition to make Glasgow the most productive major city economy in the UK by 2023. Alongside this, the strategy has set an ambitious new jobs target of 50,000 by 2023.

Glasgow City Council Corporate Structure at 1<sup>st</sup> April 2021 (Excluding Partner Organisations)

## 2 Building Standards & Public Safety Service at Glasgow City Council

### Public Interest Statement

The purpose of the building standards system is to protect the public interest. The system sets out the essential standards that are required to be met when building work or conversion of a building takes place in order to meet building regulations.

The building standards system checks that proposed building work or conversion of a building meets standards; inspections are limited to a minimal necessary to ensure that legislation is not avoided. The control of work on site is not down to the system but is a matter for contracts and arrangements in place between a builder and client.

Verifiers, appointed by Scottish Ministers are responsible for the independent checking of applications for building warrants to construct or demolish buildings, to provide services, fittings or equipment in buildings, or for conversions.

Building Standards & Public Safety is the service within Glasgow City Council which carries out the verification function.

### COVID-19 Response

Building Standards & Public Safety plays a significant role in working with owners and developers to ensure that construction works progress and buildings can be safely occupied in line with statutory obligations. We have adapted our service delivery in light of both government guidance and restrictions and our working practices are continually under review.

### Services and functions delivered

The primary purpose of the Building Standards & Public Safety service is to secure the health, safety, welfare and convenience of persons in and about buildings and others who may be affected by buildings or matters connected with buildings; to further the conservation of fuel and power; and to further the achievement of sustainable development. In order to achieve this aim, the service provides a range of statutory, non-statutory and advisory services as detailed below:

- **Verification Functions**

In accordance with the Building (Scotland) Act 2003, regulations and other associated legislation

- Verification of compliance of applications for building warrant including amendment to warrant, staged warrants and extensions to period of validity of warrant;
- Inspection of approved construction work relating to building warrants during construction and on completion in accordance with project specific construction compliance notification plans;
- Verification of compliance of Completion Certificate Submissions where no warrant was obtained;

During 2021-22, the Service received 3,424 valid Building Warrants with a value of work in excess of £670 million. In addition, the Service received 3,815 Completion Certificate Submissions.

- **Dangerous and derelict buildings**

There are occasions when public safety may become jeopardised by the condition of buildings. If action is required to safeguard the occupants or general public, the Service will take whatever action is necessary to remove the danger by enforcing the requirements of the Building (Scotland) Act 2003. The Service provides a 24-hour call-out service for Dangerous Buildings and responds to approximately 200 reports a year.

- **Unauthorised works**

The Service is responsible for enforcing the requirements of the Building (Scotland) Act 2003 on buildings constructed without warrant or in contravention of conditions of warrant, and buildings whose limited life has expired. The Service processes over 100 requests for 'Letters of Comfort' every year where works under the previous 1959 Building (Scotland) Act did not have consent.

- **Liquor Licensing**

The Licensing (Scotland) Act 2005 requires licensed premises to have an Operating Plan detailing the occupant capacity and how the premises intend to carry out their business. Building Standards provides the Licensing Board with advice on capacities and the condition of the premises in relation to public safety in accordance with the Building (Scotland) Act 2003. There are approximately 2,500 licensed premises in the City.

- **Structural Engineering**

The service's structural engineers check structural calculations submitted during the building warrant process and provide structural expertise in respect of dangerous buildings. They also contribute to event licensing by inspecting up to 300 'raised structures' such as stages and grandstands. The engineers also work collaboratively with colleagues within Planning and Housing & Regeneration services.

- **Pop concerts and public events**

The Service has a considerable input into the licensing of major events at both indoor and outdoor venues. The service reports to the Licensing Committee in relation to crowd capacity, means of escape, raised structures, crowd control barriers and general safety matters. Major events within the city often attract spectator capacities in excess of 50,000. The service provides advice on safety for the licensing of venues and other public events including COP 26, International Sporting Events and Championships, music festivals at Glasgow Green, concerts within Stadium and open-air events.

- **Safety at sports grounds**

Building Standards & Public Safety are the vital partners along with the Police, Fire Authority and Ambulance Service that make up Glasgow City Council's Safety Team for Sports Grounds. The Safety Team provides guidance to sports grounds managers and advises the Licensing Committee on stadia and regulated stand suitability for Safety Certificates. There are 4 designated stadia with capacities up to 60,000 and 6 Regulated Stands (2 of which are erected and removed on an annual basis).

- **Document searches**

The Service can provide information about properties where Building Warrants, Completion Certificates or 'Letters of Comfort' have been issued. The Service typically receives in the region of 600 requests per annum.

- **Street Naming and Numbering**

Following consultation with Councillors, Community Councils and Royal Mail, the Service allocates street names, and thereafter postal numbers, to new properties and developments.

- **Building Standards Register**

The service accurately records data and maintains an online, interactive applications register of building warrants, completion certificates and energy performance certificates.

- **Pre-warrant application meetings**

The service provides preliminary advice on the procedures to be followed to obtain building warrant approval and advising on the design of a building in terms of requirements of the regulations.

- **Miscellaneous Licensing**

The service provides an advisory role to legal services, on request, in respect of miscellaneous licenses.

Information on the full range of [Building Standards & Public Safety](#) services is available on the Council website using the link provided and includes information on how to make a building warrant application, contact our staff and report dangerous buildings.

### **Organisation Structure**

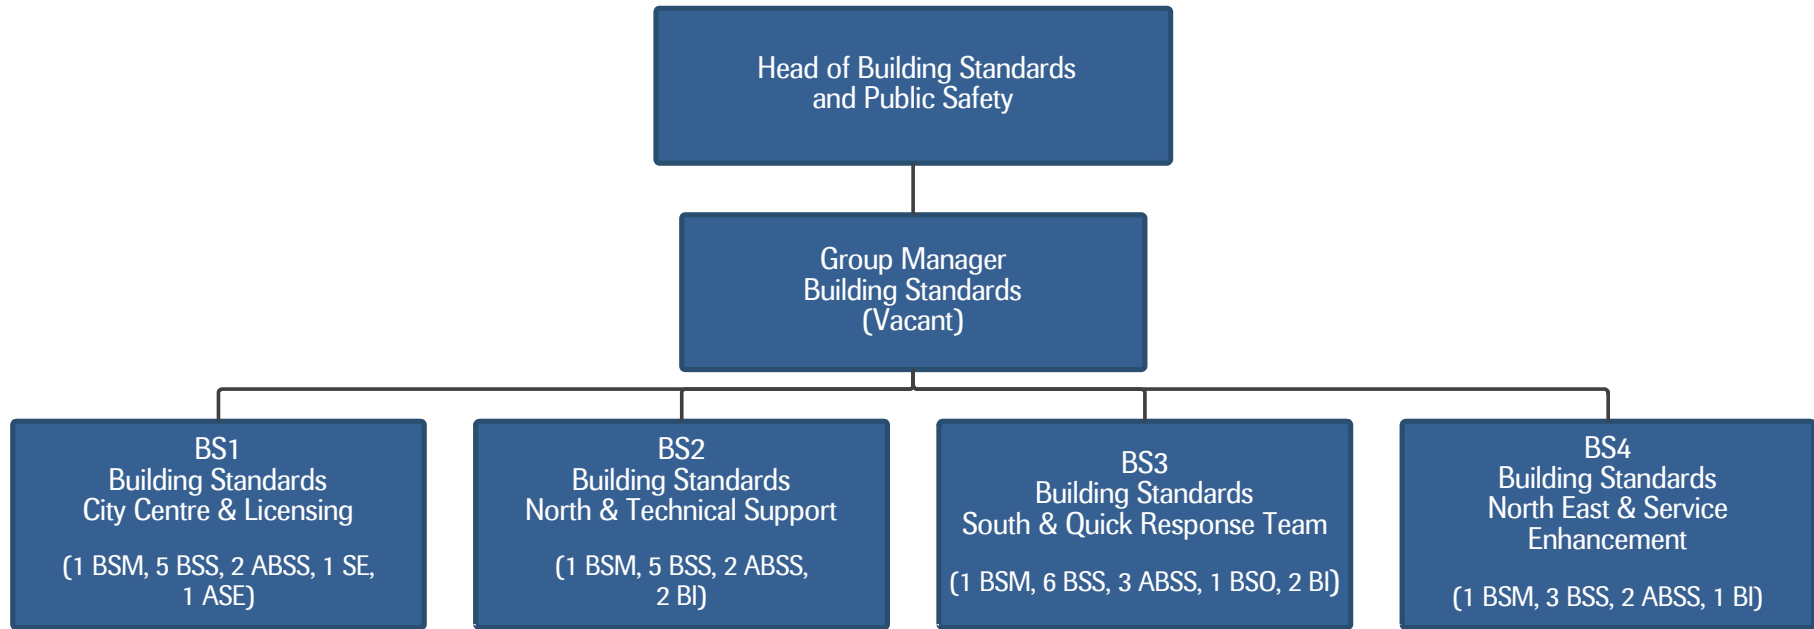

Building Standards and Public Safety had a staff compliment of 41 at 1<sup>st</sup> April 2021, including Head of Building Standards & Public Safety (BS&PS). The Council's Customer and Business Services section provides centralised administrative support to PBS.

The Service is wholly located within a city centre office building that was refurbished to support efficient working arrangements under the Tomorrows Council initiative to ensure efficient delivery of services.

The BS&PS service has 3 layers of management - Head of Service, Group Manager (vacant) with 4 No. Building Standards Area Managers. The Head of Service is also part of the Planning, Housing and Building Standards Senior Management Team.

Building Standards & Public Safety service structure is shown below highlighting the 4 area Building Standards Teams and reporting lines at 1<sup>st</sup> April 2021:

**Building Standards Staffing Levels Key**

BSM	Building Standards Manager
BSS	Building Standards Surveyor
ABSS	Assistant BSS
BSO	Building Standards Officer
SE	Structural Engineer
ASE	Assistant SE
BI	Building Inspector

## Staffing Position at 1<sup>st</sup> April 2021

The information detailed below provides a snapshot of the staffing position and age profile on 1<sup>st</sup> April 2021.

Post	Tier 1	Tier 2	Tier 3	Tier 4
Head of Building Standards Verification Service			1	

Note: Tier 1 = Chief Executive; Tier 2 = Directors; Tier 3 = Heads & Asst. Head of Service; Tier 4 = Managers

Post	Building Standards Verification Service	Other
Group Managers	0 - vacancy	
Building Standards Managers	4	
Building Standards Surveyors	19	
Asst. Building Standards Surveyors	8.6	
Building Standards Officer	1	
Building Inspectors	5	
Structural Engineers	1	
Asst. Structural Engineers	1	
<b>TOTAL incl. Head of Service</b>	<b>40.6</b>	

Staff age profile	Number
Under 30	3
30 – 39	4
40 – 49	14
50 and over	21
<b>TOTAL<sup>1</sup></b>	<b>42</b>

## Location of Office

<sup>1</sup> 41 individuals = 40.6 FTE Staff

Our office is conveniently located within the Glasgow City Centre. Our location is easily accessible for our customers and stakeholders by road or rail. Our Service is wholly located within this office and is within a few minutes' walk from subway and railway stations and is close to a number of bus routes for those wishing to travel by public transport.

**Where to find us:**

If you require any further information or assistance regarding matters raised in this document, please contact:

Glasgow City Council  
Neighbourhoods, Regeneration and Sustainability  
Building Standards & Public Safety  
231 George Street  
Glasgow G1 1RX

Our office hours are Monday to Friday: 9:00am – 5:00pm by appointment (Excludes national and public holidays).

If you wish to make an appointment, visit our office, make a comment, compliment or complaint about the service or the content of this document, further information including full contact details are available on our [How to contact Building Standards](#) webpage. Telephone and email contact details are given on this page including the option for submitting a [Building Standards Enquiry Form](#).

## 3 Strategic Objectives

### Neighbourhoods, Regeneration and Sustainability - City Development

#### Our Vision

City Development enables and supports our city to adapt and grow in an inclusive, sustainable and connected way that allows our entire city to thrive and makes Glasgow a place where people choose to live, learn, visit, shop, invest and do business. We do this by providing a broad range of technical, regulatory and regeneration-led services that work with communities and stakeholders to set policy and secure funding to deliver the best possible outcomes for all involved.

#### Our Outcomes

Our outcomes are those contained in the [City Development Plan](#) which reflects the spatial interpretation of the Council's [Strategic Plan](#) and [Glasgow Community Plan](#).

The aim of the service is to deliver a high quality and healthy sustainable place by delivering:

- A vibrant place with a growing economy – by providing the right environment for businesses to develop;
- A thriving and sustainable place to live and work – by providing opportunities to build new housing, and creating vibrant places and town centres to provide a good quality of life in the long term for the City's growing population;
- A connected place to move around and do business in – by improving accessibility for all citizens to employment, shopping and leisure destinations, and providing more sustainable travel options; and
- A green place – by helping to care for Glasgow's historic and green environments, increasing the City's resilience to climate change, and reducing energy use.

We will do this by:

- Developing effective city region, city-wide, and local policies and plans that will provide drivers to engage partners and focus development and regeneration activities to deliver sustainable and wide-ranging social, economic, environmental and cultural benefit;
- Providing effective regulation to ensure that all development and regeneration activities are compliant with local and statutory requirements and ensure public safety;
- Developing and delivering value added projects and initiatives across social, economic, environment and cultural development fronts that will enrich the quality of people's lives by improving their social, economic, and environmental well-being; and
- Making appropriate use of resources and modernise services to ensure delivery of best value by using innovation, data and technology.

### **In Planning, Housing, Building Standards & Transport Policy**

- Developing appropriate policy and strategy frameworks;
- Delivering development and regeneration projects including those funded through specific funding streams such as Glasgow City Region City Deal, Strategic Housing Investment Plan, Council's capital programme and Heritage Lottery Fund;
- Managing development applications, building warrants and completion certificates;
- Managing public safety issues such as dangerous buildings, liquor and public entertainment licences;
- Delivering on our Enforcement and Customer Charters; and
- Delivering on our [Building Standards & Public Safety Customer Charter](#).

### **In Building Standards & Public Safety**

Over the coming year the Building Standards & Public Safety service's key strategic objective is to retain the verification function for Glasgow, by adhering to the requirements of the Operating Framework for Building Standards Verifiers and by operating under the Building Standards Verification Performance Framework.

Beyond our key strategic objective relating to verification, we continue to develop to improve our statutory, non-statutory, advisory roles and non-verification functions.

## 4 Key Performance Outcomes and Targets

The national verification performance framework is based on three core perspectives:

- Professional Expertise and Technical Processes;
- Quality Customer Experience; and
- Operational and Financial Efficiency.

There are also three cross-cutting themes, comprising:

- Public Interest;
- Continuous Improvement; and
- Partnership Working.

### Summary of Key Performance Outcomes (KPOs)

#### Professional Expertise and Technical Processes

KPO1	Minimise time taken to issue a first report or issue a building warrant or amendment to building warrant.
KPO2	Increase quality of compliance assessment during the construction processes.

#### Quality Customer Experience

KPO3	Commit to the building standards customer charter.
KPO4	Understand and respond to the customer experience.

#### Operational and Financial Efficiency

KPO5	Maintain financial governance.
KPO6	Commit to eBuilding Standards.
KPO7	Commit to objectives outlined in the annual performance report.

## Summary of Key Performance Targets

### KPO1 Targets

1.1	95% of first reports (for building warrants and amendments) issued within 20 days – all first reports (including BWs and amendments issued without a first report).
1.2	90% of building warrants and amendments issued within 10 days from receipt of all satisfactory information – all building warrants and amendments (not including BWs and amendments issued without a first report).

### KOP2 Targets

	Targets to be development as part of future review of KPO2 by the Scottish Government.
--	--

### KPO3 Targets

3.1	National customer charter is published clearly on the website and incorporates version control detailing reviews (reviewed at least quarterly).
3.2	95% of Building Standards Division (BSD) requests for information on a BSD 'Verifier Performance Reporting Service for Customers' case responded to by verifier within 5 days.

### KPO4 Targets

4.1	Minimum overall average satisfaction rating of 7.5 out of 10.
-----	---

### KPO5 Targets

5.1	Building standards verification fee income to cover indicative verification service costs (staff costs plus 30%).
-----	---

### KPO6 Targets

6.1	Details of eBuilding Standards to be published clearly on the verifier's website.
6.2	75% of each key building warrant related process being done electronically <ul style="list-style-type: none"> <li>• Plan checking</li> <li>• Building warrant or amendments (and plans) being issued</li> <li>• Verification during construction</li> <li>• Completion certificates being accepted</li> </ul>

### KPO7 Targets

7.1	Annual performance report published clearly on website with version control.
7.2	Annual performance report to include performance data in line with KPOs and associated targets (annually covering previous year e.g., 1 <sup>st</sup> April 2021 – 31 <sup>st</sup> March 2022).

## 5 Performance Data

### Performance Targets Rolling Snapshot

TARGETS	1.1	1.2	3.1	3.2	4.1	5.1	6.1	6.2	7.1	7.2
	95% of first reports (for building warrants and amendments) issued within 20 days – all first reports (including BWs and amendments issued without a first report).	90% of building warrants and amendments issued within 10 days from receipt of all satisfactory information – all building warrants and amendments (not including BWs and amendments issued without a first report).	National customer charter is published prominently on website & incorporates version control detailing reviews (reviewed at least quarterly).	95% of BSD <sup>4</sup> requests for information on a BSD <sup>2</sup> Verifier Performance Reporting Service for Customers' case responded to by verifier within 5 days.	Minimum overall average satisfaction rating of 7.5 out of 10	Building standards verification fee income to cover indicative verification service costs (staff costs plus 30%).	Details of eBuilding Standards are published prominently on the verifier's website.	75% of each key building warrant related processes being done electronically (Plan checking; BWs & amendments (& plans) issue; Verification during construction; CC acceptance)	Annual performance report published prominently on website with version control (reviewed at least quarterly).	Annual performance report to include performance data in line with KPOs and associated targets (annually covering previous year e.g., April 2016 – March 2017).
<b>Q1 2020-21 (April – June)</b>	97.65%	71.88% <sup>3</sup>	Published prominently (with review)	No cases referred to BSD <sup>4</sup> Reporting Service	5.4	106.52%	Published prominently	3 of 4 done	Published prominently (with review)	Includes all performance data
<b>Q2 2020-21 (July – Sept)</b>	95.46%	65.72% <sup>5</sup>	Published prominently (with review)	No cases referred to BSD <sup>4</sup> Reporting Service	5.4	120.61%	Published prominently	3 of 4 done	Published prominently (with review)	Includes all performance data

<b>KPO2</b>	<b>Increase quality of compliance assessment during the construction processes.</b>										
	Targets to be developed as part of future review of KPO2.										

### **Protocols for dealing with work**

The service has in place risk management protocols for dealing with the management and allocation of work on building warrants and completion certificates. The protocols form part of the council's quality assurance procedures which apply to all building standards work. Risk management procedures are used to ensure applications are allocated to staff who are suitably qualified and experienced to deal with them. In addition, the service operates a 5% quality and technical check in relation to all building warrant applications and completion certificate submissions.

### **Performance management systems**

The service uses a range of systems to ensure effective management of the service including Microsoft Access Database Reports, Idox Enterprise Reports and a time recording system (Plancentric). Reports are used to assist in the management of workload and the production of weekly, monthly, quarterly and annual performance monitoring reports assist in performance management. Regular meetings are held between Building Standards Managers and group managers to discuss performance and any issues arising therefrom.

### **Training and development/CPD**

Our service recognises that it is essential that staff have appropriate building standards related qualifications and experience and that it is maintained through CPD. Technical staff are members of professional organisations and complete CPD in accordance with their respective membership requirements. The service also has specialisms in structural and fire engineering to help support the verification function. Expertise on both fire and structure was increased with two members of staff undertaking further education in Fire Risk Engineering and a research degree on the performance of tall timber buildings.

All staff have access to online advice and guidance in relation to procedures, legislation, fees and technical handbooks as well as a corporate training package for learning and development opportunities. Training needs are identified through team meetings and one-to-one discussions with Building Standards Managers. The introduction of eBuilding Standards in August 2016 and the continued drive to digitise services results in IT training being provided by the Departments Service Development Group as necessary.

Performance Coaching and Review (PCR) is the agreed approach within Development & Regeneration Services to help to maximise employee performance and increase engagement. PCR is a performance management system that supports the delivery of the council's and individual goals and objectives. It is a tool for development and continuous improvement that provides a way of fostering effective working relationships, behaviours and outcomes. The objective of PCR is to make sure that employees understand what is expected of them, have an opportunity to fulfil their full potential and are given honest feedback on what they are doing well and what they need to do better.

## Benchmarking

We work with our fellow local authorities in [Local Authority Building Standards Scotland](#) (LABSS) to enhance national delivery of Building Standards services throughout Scotland. Our service is the lead authority for LABSS Clyde Valley Consortium. The work is extensive with 3 monthly attendance at management meetings, general meetings, consortia meetings as well as contribution to working groups and technical forums.

We are also part of a Core Cities Building Standards Group comprising senior managers from Glasgow, Edinburgh, Aberdeen & Dundee covering areas of shared interest across service functions.

## Resourcing, Workforce and Succession Planning

Resource and workforce planning continued on the basis of the baseline staff compliment established in 2021. This has given BS the opportunity to consider our live business priorities and importantly plan ahead in order to position BS as a more resilient service with the skillsets we require to deliver our service work programme, statutory obligations, GCC Strategic Plan/Service Plan commitments and our regeneration and placemaking priorities as identified in the statutory Development Plan. Graduate intake through regeneration resourcing has re-established an external intake which will be built upon. The DRS 2019-2022 Workforce Plan identified the creation of Building Standards Graduate Apprenticeship posts during 2020/21 however, due to Covid, these could not be filled, and we are now looking into Modern Apprentices as a mechanism for succession planning. The model for resourcing, workforce and succession planning is incorporated within our business plan.

## Quality Customer Experience

KPO3	Commit to the building standards customer charter
Target 3.1	National customer charter is published prominently on the website and incorporates version control detailing reviews (reviewed at least quarterly).  <b>Our Performance:</b> <a href="#">Our Building Standards &amp; Public Safety Customer Charter</a> is published prominently on our website and incorporates version control.
Target 3.2	95% of Building Standards Division (BSD) requests for information on a BSD 'Verifier Performance Reporting Service for Customers' case responded to by verifier within 5 days.  <b>Our Performance:</b> <a href="#">No cases referred to BSD 'Reporting Service'</a>

KPO4	Understand and respond to the customer experience
Target 4.1	<p>Minimum overall average satisfaction rating of 7.5 out of 10.</p> <p><b>Our Performance:</b>  Py Tait Consulting was commissioned to undertake the 2021 national customer satisfaction survey. For this survey, the overall satisfaction with our service was given a rating of 5.7 out of 10.</p> <p><b>Commentary:</b>  The 2021 customer satisfaction rating represents a 0.5-point decrease over our 2020 results and is the first dip in in performance rating in 4 years which we believe has been impacted by Covid as the national average has also seen a commensurate drop. Whilst taken over 5 years there is still an upwards trend in customer satisfaction, the results of the 2021 survey together with feedback from our local engagement activities will be collated, analysed and the findings used to identify service improvements aimed at improving the customer experience.</p>

### Customer Communication Strategy

The service recognises the importance of effective communication with customers and engages with them in a number of ways including:

- Performing building warrant exit surveys;
- Hosting stakeholder events (subject to COVID-19 restrictions);
- Facilitating technical and procedural meetings with design team for large / complex building (currently subject to COVID-19 restrictions; MS Teams available);
- Provision of a regularly updated and informative [website](#);
- Publication of our [Customer Charter](#) online;
- Provision of Interactive Voice Response (IVR) telephone system including option for contacting service for general enquiries (currently subject to COVID-19 restrictions; MS Teams available);
- Provision of online [Building Standards Enquiry Form](#);
- Regular review of correspondence issued by the service to ensure accurate and effective customer engagement; and
- Provision of a dedicated dangerous building phone line.

Building Standards ensure that staff are aware of their responsibility for delivering improved customer engagement and that they adhere to service improvements.

### Customer Charter

Our [Building Standards & Public Safety Customer Charter](#) is published prominently online and provides information about the standards of service that customers can expect. It sets out our vision, aims, and service commitments and provides general information on our service.

## **Customer Feedback**

The service participates in the national customer satisfaction survey for building standards carried out by the Scottish Government. We are fully committed to the survey and would encourage all our customers to participate in survey returns when receiving building warrant approval. The National Customer Survey link is also publicised and available on "[Our Performance](#)" webpage. We will also consider extending the availability of the survey once it has bedded in. Customer feedback is also sought through local engagement activities such as building warrant exit surveys and stakeholder events (subject to COVID-19 restrictions). Local and national feedback is collated, analysed and the findings used to identify improvements that can be made to the customer experience and which are incorporated in the service's continuous improvement plan.

We provide information on how to [comment, compliment or complain](#) about the service and once again, this information is used to inform service delivery and improve the customer experience. All changes to service delivery are reviewed to ensure their effectiveness.

## **Accessibility of service**

Our customers have the opportunity to contact us by email, telephone, letter personal visit (pre-arranged meeting) or by using our website which includes a [Building Standards Enquiry Form](#). Our service is located wholly within a city centre office and is readily accessible due to excellent road and rail links. We provide a 24-hour call-out service to safeguard the public from dangerous buildings. Our website is regularly reviewed and updated to ensure relevant information and guidance on the service we provide is available for customers. Our site inspection service is tailored to be as flexible as possible, within working hours, to accommodate the different needs of our customers.

## **Pre-application advice**

For smaller projects, the enquirer is encouraged to review the service's website and to refer to the [Building Standards Customer Journey](#) guide issued by the Scottish Government. There is also guidance on what makes a good quality application "[Making a quality building warrant application: what you need to know](#)". Where the project is large or complex, pre-application meetings can be arranged via the Building Standards Manager relative to the geographical area of the proposed development (currently MS Teams due to COVID-19 restrictions). The service's [Building Standards Enquiry Form](#) can also be used to seek pre-application advice on matters such as interpretation and application of standards and to request a meeting.

## **Customer agreements**

Customer agreements are available to all applicants where the standard 20-day target may not be appropriate due to the scale or complexity of the project.

## **Customer dissatisfaction (procedural or technical)**

Whilst we seek to resolve any issues immediately, our [Customer Charter](#) details how to make comment, compliment or complaint; what to do if you don't agree with our technical decision and what to do if you have any concerns about our performance. For more information, please see our online [Customer Charter](#).

## Operational and Financial Efficiency

KPO5	Maintain financial governance																				
Target 5.1	<p>Building standards verification fee income to cover indicative verification service costs (staff costs plus 30%).</p> <table border="0"> <thead> <tr> <th colspan="2" data-bbox="376 320 1025 355"><b>Our Performance 2020 - 2021</b></th> <th colspan="2" data-bbox="1048 320 2110 355"><b>Our Performance 2021 - 2022</b></th> </tr> </thead> <tbody> <tr> <td data-bbox="376 355 757 391">Q1 2020-21 (April - June)</td> <td data-bbox="757 355 1025 391">106.52%</td> <td data-bbox="1048 355 1429 391">Q1 2021-22 (April - June)</td> <td data-bbox="1429 355 2110 391">141.20%</td> </tr> <tr> <td data-bbox="376 391 757 426">Q2 2020-21 (July - Aug)</td> <td data-bbox="757 391 1025 426">120.61%</td> <td data-bbox="1048 391 1429 426">Q2 2021-22 (July - Sept)</td> <td data-bbox="1429 391 2110 426">161.95%</td> </tr> <tr> <td data-bbox="376 426 757 461">Q3 2020-21 (Oct - Dec)</td> <td data-bbox="757 426 1025 461">114.76%</td> <td data-bbox="1048 426 1429 461">Q3 2021-22 (Oct - Dec)</td> <td data-bbox="1429 426 2110 461">140.67%</td> </tr> <tr> <td data-bbox="376 461 757 496">Q4 2020-21 (Jan - Mar)</td> <td data-bbox="757 461 1025 496">248.90%</td> <td data-bbox="1048 461 1429 496">Q4 2021-22 (Jan - Mar)</td> <td data-bbox="1429 461 2110 496">TBC – Financial Year End Calculations in Progress</td> </tr> </tbody> </table>	<b>Our Performance 2020 - 2021</b>		<b>Our Performance 2021 - 2022</b>		Q1 2020-21 (April - June)	106.52%	Q1 2021-22 (April - June)	141.20%	Q2 2020-21 (July - Aug)	120.61%	Q2 2021-22 (July - Sept)	161.95%	Q3 2020-21 (Oct - Dec)	114.76%	Q3 2021-22 (Oct - Dec)	140.67%	Q4 2020-21 (Jan - Mar)	248.90%	Q4 2021-22 (Jan - Mar)	TBC – Financial Year End Calculations in Progress

KPO6	Commit to eBuilding Standards																				
Target 6.1	<p>Details of eBuilding Standards to be published prominently on the verifier’s website.</p> <p><b>Our performance:</b>  <a href="#">Details of eBuildingStandards.scot</a> is published prominently on <a href="#">Building Standards &amp; Public Safety</a> website including a direct link there to.</p>																				
Target 6.2	<p>75% of each key building warrant related process being done electronically</p> <ul style="list-style-type: none"> <li>• Plan checking</li> <li>• Building warrant or amendments (and plans) being issued</li> <li>• Verification during construction</li> <li>• Completion certificates being accepted</li> </ul> <p><b>Our Performance:</b>  100% of our applications are dealt with digitally, including plan checking, whether initially applied for online or otherwise. Paper applications are scanned on receipt to allow all warrant processes to be circulated using electronic workflow in the same manner as online applications.  100% of building warrants and amendments to warrants are issued electronically.  We are currently developing our systems to facilitate electronic verification during construction including carrying out site assessment using electronic devices.  100% of Notices of Acceptance of Completion Certificate submissions are issued electronically.</p>																				

KPO7	Commit to objectives outlined in the annual performance report
Target 7.1	Annual performance report published prominently on website with version control (reviewed at least quarterly).  <b>Our Performance:</b> Our Building Standards Verification Annual Performance Report is published prominently on our website under “ <a href="#">Our Performance</a> ” and includes version control.
Target 7.2	Annual performance report to include performance data in line with KPOs and associated targets (annually covering previous year e.g., 1 <sup>st</sup> April 2021 – 31 <sup>st</sup> March 2022).  <b>Our Performance:</b> Our performance data for 2021-22 is included in the Annual Performance Report. The Report includes quarterly updates in respect of performance and service improvements.

### Team structures

Our Building Standards Verification service is split on a geographic basis by council ward boundaries into four areas. Each Building Standards Manager has enhanced duties on a city-wide basis as follows:

- **North & Technical Support** – processing of applications for alternative means of compliance (non-fire engineering), act as the service’s technical representative for LABSS Clyde Valley Consortium.
- **City Centre & Licensing** – processing of applications for alternative means of compliance (fire-engineered solutions), functions for licensing, safety at sports grounds and raised structures.
- **South & Quick Response Team** – out of hours emergency service (Quick Response Team – QRT), health and safety advice including maintenance of PPE register, lead on internal electronic workflow.
- **North East & Service Enhancement** – service enhancement and customer engagement initiatives, performance reporting and continuous improvement plan.

### Time recording system

All staff record their time within the Plancentric time recording system. This computerised system can provide a range of reports and is used by the service as an internal performance management tool. The system is also used to provide performance information to the Scottish Government in respect of % building warrant fee related income spent on verification.

## **Financial Monitoring**

Monthly monitoring of fee income is undertaken. Verification costs are reported on a quarterly basis to the Scottish Government's Building Standards Division (BSD). Verification income is also reported on a quarterly basis to BSD.

## **IT systems**

The main IT systems, databases and performance management tools used by the service to perform and support the verification function including electronic workflow are Uniform, IDOX DMS, Enterprise and Microsoft Access. These systems help improve our performance and efficiency and reflect our commitment to digitalisation and eBuilding Standards. This approach has enabled us to introduce the rapid changes that were required to enable our teams to work effectively from home during the COVID-19 crisis. Staff guidance and procedural documents continue to be migrated to Electronic Process Models.

## **Digital Services**

All our building warrant applications are dealt with digitally. Paper applications are scanned on receipt to allow all warrant processes to be circulated using electronic workflow in the same manner as online applications. We are currently developing our systems to facilitate electronic verification during construction including carrying out site assessment using tablet PC's and for the acceptance of completion certificates electronically from a site location.

## **Internal Communication Strategy**

Regular meetings take place with the Building Standards Management Team with information being cascaded to staff via the most appropriate medium including regular team meetings, briefings, emails or the issue of updated guidance notes or process models. Team meetings are held regularly to discuss technical, procedural and performance issues and allow staff members to raise any issues in this forum. All staff have access to online advice and guidance in relation to procedures, legislation, fees and technical handbooks and this system is used to disseminate information on changes or updates thereto. Staff are also encouraged to register online with LABSS for technical and procedural information and awareness of current building standards issues. We can communicate and hold meetings electronically which has meant that we communicated effectively during restrictions imposed by the COVID-19 crisis.

## 6 Service Improvements and Partnership Working

**In the previous 12 months (2021/2022) the Building Standards Service progressed the following Service Improvements:**

Please note that our ability to implement planned service improvements during this period were severely impacted due to the COVID-19 epidemic. As a consequence, a number of items have been delayed or continued until 2022/23.

Number	Continuous Improvement Actions (Performance Framework Core Perspective in brackets)	Timescale
1	Monitor and improve workflow processes in respect of e-Building Standards and electronic workflow. (Professional Expertise and Technical Processes)	Continuous
2	Contribute to Corporate aims in delivering the programme of investment in new social housing. (Professional Expertise and Technical Processes)	Continuous
3	Continue to develop Idox Enterprise Graphs and Reports in conjunction with current Access Database Reports to give best combined suite of management reporting. (Professional Expertise and Technical Processes)	Continuous
4	Continue to develop enhanced training and CPD opportunities for all Building Standards Staff building on existing training calendar. Encourage and assist staff in their personal and professional development. (Professional Expertise and Technical Processes)	Continuous
5	Upgrade Uniform and IDOX Enterprise as necessary to ensure we have up to date efficient systems for service delivery. (Professional Expertise and Technical Processes)	Continuous
6	Review content and quality of all information and guidance available online including ability to provide feedback on the service in respect of comments, compliments or complaints. (Quality Customer Experience)	Continuous
7	Monitor and review customer accessibility to the service, identify and implement improvements. (Quality Customer Experience)	Continuous
8	Working with our colleagues in Service Development to continue to develop and improve our systems and processes. (Professional Expertise and Technical Processes & Quality Customer Experience)	Continuous
9	Monitor, review and implement improvements to customer engagement in light of customer feedback (comments, compliments & complaints, stakeholder events) and in line with both local and national survey results. (Quality Customer Experience)	Continuous

Number	Professional Expertise and Technical Processes – Improvement Actions	Timescale
1	Rollout of new IT equipment across the service including upgraded laptops and hybrid devices with associated upgrade of operating systems with aim of increased productivity and greater efficiency.	Completed
2	Improve the functionality of mobile app/devices to broaden their use within Building Standards and to facilitate electronic verification during construction. Note – timescale is linked to and dependent on successful implementation of IT rollout and upgrade identified in 1. above. This is also an improvement item in relation to Operational & Financial Efficiency. <a href="#">This item relies on assistance from colleagues in CGI and Service Development.</a> <a href="#">On site verification covid delayed.</a>	Electronic Plan viewing on site Electronic verification cont'd 22/23
3	Develop IT systems to create unique identifier for building work categories and building types in conjunction with a suite of reports that will assist in performance monitoring, trend analysis, resource allocation and identification of work priorities. <a href="#">This item relies on assistance from colleagues in Service Development.</a> <a href="#">Covid delayed.</a>	Continued 22/23
4	Following the introduction of the Building Standards Professional Competency Framework (Professional Framework), implement the Competency Assessment System (CAS) for all Building Standards staff as a workforce development tool.	Ongoing & Continued 22/23

Number	Quality Customer Experience – Improvement Actions	Timescale
1	Customer service improvements and customer care initiatives identified through the Planning & Building Standards EFQM process to be finalised and implemented.	Completed
2	Participate in newly established Customer Service Group to identify and implement customer service improvements including exploring potential for participation in the development of a social media presence.	Ongoing
3	Seek solution for emailing of Warrant Refusal Letter (LET 3) and the warrant refusal. This item requires assistance from colleagues in service development. <a href="#">Covid delayed</a>	Continued 22/23
4	Undertake Staff Performance Coaching & Review (PCR) and progress any skills gaps, training or development initiatives to support the evolving needs of the service and the individual. NB PCR completed, training ongoing. PCR/training to be linked to introduction of Competence Assessment System as noted in Professional Expertise improvement action No. 4 above. <a href="#">Covid delayed</a>	Ongoing & Continued 22/23
5	Together with administration and Service Development colleagues, review electronic storage of plans, documents, certification etc within Part II of the Building Standards Register including an agreed naming and numbering convention in order to ensure efficient and effective storage and subsequent retrieval of information. <a href="#">This item relies on assistance from CBS and Service Development colleagues.</a> <a href="#">Delayed Due to Covid-19</a>	Continued 22/23
6	Continue to review and update website provide advice and guidance to customers in the form of “Information Guide for Service Users” webpage detailing service provision during COVID-19 pandemic.	Completed

Number	Operational & Financial Efficiency – Improvement Actions	Timescale
1	Maintain a robust and resilient Building Standards & Public Safety Service where resourcing and succession planning is embedded within our business plan.	Review quarterly
	The service's workforce plan identifies the creation of 2 new Building Standards Graduate posts to help meet the succession planning aims of our Business Plan. Building Standards intends to recruit these Graduates during 2021/22. <a href="#">Covid delayed.</a> <a href="#">Modern Apprentices to be considered for 22/23</a>	Continued 22/23
	The workforce plan also highlights the remit of the Ministerial Working Group to redefine fire and building regulatory frameworks. Additional Building Standards resource has been identified as likely; however, numbers and timescales are unknown at this point. This requirement will be monitored via the Workforce Planning Board.	Reviewed Quarterly
2	Continue work in line with the European Foundation for Quality Management (EFQM) Excellence Model as an overarching framework for developing sustainable excellence. Finalise action plan for short, medium and long-term improvements and implement. Implement improvement initiatives.	Completed
3	<p>Continue commitment to eBuilding Standards by</p> <ul style="list-style-type: none"> <li>• Participate in Scottish Government's Remote Verification Inspection (RVI) Practice Group. <a href="#">Ongoing</a></li> <li>• Support Scottish Government's RVI research /trials project to compare the quality of remote inspections with physical checks. <a href="#">Ongoing</a></li> <li>• Continue to participate in LABSS Digital Transformation Group (DTG). <a href="#">Ongoing</a></li> <li>• As noted in Professional Expertise &amp; Technical Processes item 2 above, improve the functionality of mobile app/devices to broaden their use within Building Standards and to facilitate electronic verification during construction. <a href="#">Electronic plan viewing via IT completed.</a> <a href="#">Covid delayed re electronic verification.</a></li> </ul>	Ongoing
4	Participate in NRS's review of Health and Safety procedures and implement any changes or updates for Building Standards to ensure safe working (site and office) for all staff. <a href="#">Covid procedures completed and in place.</a> <a href="#">Full review of H&amp;S procedures delayed due to Covid.</a> <a href="#">This item requires assistance from our colleagues in Health &amp; Safety (NRS)</a>	Continued 22/23

**In the next 12 months (2022/2023) the Building Standards Service will progress the following Service Improvements:**

<b>Number</b>	<b>Continuous Improvement Actions (Performance Framework Core Perspective in brackets)</b>	<b>Timescale</b>
1	Monitor and improve workflow processes in respect of eBuilding Standards and electronic workflow. (Professional Expertise and Technical Processes)	Continuous
2	Contribute to Corporate aims in delivering the programme of investment in new social housing. (Professional Expertise and Technical Processes)	Continuous

5	Introduce hybrid working pilot for staff that considers benefits of work –life balance whilst ensuring that the service delivers on its operational and performance requirements.	Reviewed Quarterly

## **Partnership Working**

The Service actively seeks working partnerships where the co-ordination of service delivery with similar providers can lead to a better service for customers and other stakeholders.

### **In the previous 12 months (2021/22) we worked with:**

#### **Within Neighbourhoods, Regeneration & Sustainability**

Building Standards liaise with Service colleagues who have a shared interest in:

- Dangerous and derelict buildings when emergency action is required.
- Listed Buildings being altered to comply with Building Standards.
- Planning enforcement.
- Engineering assistance to Planning functions.
- City Services Group to facilitate temporary consents related to business assistance during Covid-19 and beyond (Building Standards, Roads, Environmental Health, Trading Standards and Licensing from Chief Executive's Department).
- Building Standards and Environmental Health provide a co-ordinated service for public health and safety when:
  - Ensuring standards at events within the City, such as pop concerts.
  - Ensuring standards within licensed premises.
  - Road/footpath diversions during dangerous building incidents.

#### **Chief Executives Department**

Building Standards provides advice to the Licensing section on the suitability of properties for:

- Public Entertainment Licence
- Liquor Licence
- Sports Ground Safety Certification

#### **Local Authority Building Standards Scotland (LABSS) & Clyde Valley Consortium**

We work with our fellow Local Authorities in [Local Authority Building Standards Scotland](#) (LABSS) to enhance national delivery of Building Standards services throughout Scotland. Our service is also the lead authority for the LABSS Clyde Valley Consortium Group comprising Glasgow City, Argyll and Bute, East Dunbartonshire, East Renfrewshire, Inverclyde, Renfrewshire and West Dunbartonshire Councils.

### **Scottish Fire and Rescue**

Building Standards work in partnership with the Fire and Rescue Service:

- During building warrant verification process (where required).
- At sports grounds, as part of the Councils' Safety Team.
- When ensuring standards at events within the City, such as pop concerts.
- At dangerous buildings incidents where there is a risk to the public.
- Document exchange trial through eBuilding Standards.

### **Police Scotland**

Building Standards work in partnership with the Police to maintain public safety:

- At sports grounds, as part of the Council's Safety Advisory Group.
- When ensuring standards at events within the City, such as pop concerts.
- Licensing of premises.
- At dangerous buildings incidents where there is a risk to the public.

### **Scottish Ambulance Service**

Building Standards work in partnership with the ambulance service:

- At sports grounds, as part of the Council's Safety Advisory Group.
- When ensuring standards at City events, such as pop concerts.

### **Arms-Length External Organisations**

The Service also works with various arms-length external organisations established by the Council, including:

- Glasgow Life
- City Building (Glasgow) LLP
- Glasgow Community and Safety Services Ltd
- City Property (Glasgow) LLP
- CGI (IT Service Provider & Helpdesk)

## **Building Standards Division – Scottish Government**

- Compliance and Enforcement Working Group – Building Standards Division via LABSS
- Compliance Plan
- Annual Workforce Data Collection
- Workforce Strategy work stream
- Digital Transformation work stream
- Verification Standards Work stream
- National Customer Survey working group
- Building Standards Health Resilience Group related to temporary healthcare facilities during Covid-19
- Section 2 Fire working group

## **Others**

- LABSS / BSD – Ambassadors Network
- Health & Safety Executive
- Core Cities Group for Building Standards (Glasgow, Edinburgh, Aberdeen & Dundee)

## **In the next 12 months we will work with:**

We will continue to engage with our partners and customers outlined above and our new colleagues within Neighbourhoods, Regeneration and Sustainability. We will seek to strengthen existing partnership working wherever possible and consider new partnerships where the opportunity arises.

Building Standards will also continue to support and contribute to the work of the Building Standards Division's Futures Board established to oversee and direct a programme of work to implement the recommendations from the recent Building Standards reviews on Fire Safety and Compliance & Enforcement.

## 7 Additional Data for 2021/22

Verifiers provide returns to Scottish Government on their verification performance and workload. The performance data relates to the building standards verification performance framework and the workload data relates to the numbers of building warrant applications; completion certificates; fees; costs; certificates (certification, energy performance; sustainability); enforcement cases.

The table below provides additional workload data for the year 2021/22.

Building Warrants and Amendments to Building Warrant	3,424 Applications 3,066 Decisions
Completion certificates	3,815 Submissions 3,633 Decisions
Certification	905 Certificates of design submitted 3 Certificate of construction submitted
Energy Performance Certificates (EPCs)	Domestic 1,234 Non-Domestic 13
Statements of Sustainability	Domestic 1,087 Non-Domestic 7
Enforcement	5 Notices served under sections 25 to 30 0 Cases referred to procurator fiscal 35 Cases where LA has undertaken work
